

**Dr. Kowalski,
MD, FACOG, FACS**

Dr Kowalski attended The Johns Hopkins University where she received her Bachelor of Arts in Biology in 1986. She studied medicine at Washington University in St. Louis where she graduated with honors and developed her interest in gynecologic surgery. She did her residency in Obstetrics and Gynecology at Magee-Women's Hospital in Pittsburgh, and then returned to Washington University for her fellowship in Gynecologic Oncology. Her research interests included the genetics of uterine cancer and a rare form of ovarian cancer called primary peritoneal cancer.

She moved to Las Vegas in 1998 where she has been practicing gynecologic oncology and founded Nevada Surgery and Cancer Care in 2005. She developed an interest in minimally invasive surgery in her residency training, and, here in Las Vegas, has established one of the busiest robotic surgery programs in the United States. Her passions outside of the practice of medicine include scuba diving and nature photography. Some selections of her photographs are on display in our office on Maryland Parkway.
