

Richard M. Wasserman MD.

A native of Southern California Dr. Richard Wasserman completed his undergraduate degree in Biochemistry and Cellular Biology at the University of California in San Diego. He then went on to pursue a Masters of Science and Medical Degree at The Chicago Medical School.

After medical school he completed an internship in Obstetrics and Gynecology at The Ohio State University. He continued his studies in Obstetrics and Gynecology through residency at Dartmouth-Hitchcock Medical Center in New Hampshire. Fellowship training in Urogynecology and Female Pelvic Reconstructive Surgery was performed at Scott and White Hospital in Temple, Texas under the direction of Bobby Shull MD and Tristi Muir MD.

Dr. Wasserman joined Nevada Surgery and Cancer Care to develop the Urogynecology and Pelvic Reconstructive Surgery section. His practice focuses on consultative services involving the evaluation and management of disorders of the pelvic floor including urinary incontinence and pelvic organ prolapse.

Using the most current and minimally invasive techniques Dr. Wasserman offers his patients both surgical and non-surgical treatments for pelvic floor disorders. "My goal is to individualize care for my patients and address their specific expectations in regards to management of pelvic and bladder conditions."
